Mr. William M. King
Minnesota Pollution Control Agency
115 South Vine
Fergus Falls, Minnesota 56537

Dear Mr. King:

As per our telephone conversation of Friday, November 2, 1973, the acetone waste at our Silverline plant is delivered to the local land-fill, where their personnel dispose of the material. Our weekly delivery is approximately 3 to 4 drums per week.

The chemical composition of this material is not known by our personnel, however, our supplier is Worum Chemical Company in Minneapolis. Perhaps they will be able to assist you on this subject.

The only other items delivered to local land-fill that may be toxic is scrap fiberglass parts that are cut up and delivered to local land-fill, however, this only occurs approximately two times a month.

Yours truly,

SILVERLINE INC.

Joe Burrow
Vice President of Operations
